SWIMMING POOLS

p1

Nabaki Afrika Ltd was registered in Tanzania in 1993. We installed our first Pool in 1993 for Mbuyuni Camp in the Selous. Since then, we have supplied over **400 Liner Swimming Pools** in and around Tanzania, and have waterproofed, coated and commissioned a number of **Concrete Swimming Pools** - both for Commercial (Hotels & Schools) and Domestic use, including:

Tusker Safaris - "Vuma Hills" (Mkumi)
Pangani Lodge (Pangani)
Jangwani Sea Breeze Hotel
Sunrise Hotel (Zanzibar)
Mikumi Hotel - Milami
Mbwani Ruins Hotel - Zanzibar
Mbuyuni Hotel - Selous
Upanga Nursery School - Dar
Halcyon - Arusha
International School - Uganda
MD BP Tanzania
MD Standard Chartered Bank
MD Kilombero Sugar Estates
Mtoni Marine - Zanzibar
Sunrise - Zanzibar
Coliseum Gym - Oyster Bay
Panagani Hotel - Panagni
Concrete Swimming Pools:
International School of Tanganyika
Coral Beach Club - Dar
Mediterraneo-Kawe
Millenium Towers (1st Floor)
Peacock Hotel - Dar es Salaam city

Please note, that whilst LINER swimming pools are faster to install, and cheaper than conventional concrete pools, - we will also undertake to advise, design, waterproof, coat as well as supply and install Filtration, lights, water features etc.

Our pricing is VERY **Competitive** (even Internationally) and have installed Swimming Pools for many Embassies in Tanzania **IRISH, SWEDISH, RUSSIAN x 2, INDOMESIAN, SPANISH, SOUTHAFRICAN, MALAYSIAN, DANISH, BELGIAN, CANADIAN & ITALIAN**, and a large **25m x 12m School Pool in Uganda.**

We have numerous competitive advantages making us the most comprehensive pool supplier in Tanzania

Whilst our supplier has a Std range of shapes and sizes, he can also custom make almost any shape or size to your specification

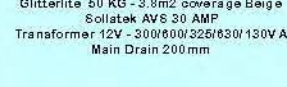

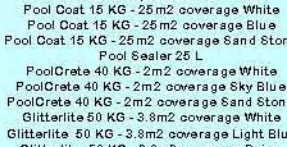

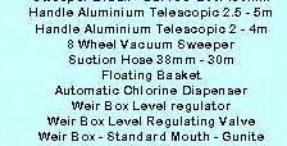

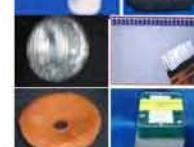

POOL EQUIPMENT

p2

We stock the WIDEST range of Swimming Pool Equipment in Tanzania!

Diving Board Length 1.6m X 0.35m
Complete Slide - Straight Height 1.3m
Poolside S/s Shower-Head, Foot wash H2m
Life Buoy 730mm
Leaf Skimmer Net Scoop
Leaf Skimmer Net - Deep water
Hand Brush
Vacuum Sweeper Brush - Rectangular
Sweeper Brush - Curved 280/480mm
Handle Aluminium Telescopic 2.5 - 5m
Handle Aluminium Telescopic 2 - 4m
8 Wheel Vacuum Sweeper
Suction Hose 38mm - 30m
Floating Basket
Automatic Chlorine Dispenser

WATER FILTERS

p4

Water filtration is relative to the quality of water available, and the quality of water required. As the quality of water available is often lacking in Tanzania, we offer 3 types of Filtration systems to suit your requirements. Maintenance on all our filters in simple and minimal...and will "self-clean" at the turn of a valve.

[1] AQUA-MAX®: 3,000L/HR > .10 microns

Is an **in-line water filter** which contains a special media called **ZEOLITE®** which effectively removes dirt and suspended particles from water > 10 microns.

APPLICATIONS : - Ideal for cleaning water for Showers, Baths, Washing Machines and general use, Lodges & Hotels

ADVANTAGES :

- **SIMPLICITY** – simple yet efficient filtration
- **EASY INSTALLATION** – Line IN and Line OUT
- **HIGH FILTRATION RATES**: 3,000l per hour
- **SIMPLE & EFFICIENT & BACKWASH** – (multiport valve)
- **REMOVES** – chloramines & absorbs ammonia

Specifications : Size (Diam x Ht) : 300 x 900mm / Filter Type: Zeolite Media Resin casing / MinWP: 1Bar / Max WP: 10 Bar / Operating Flow : 3,000L/min / Particle Size < 10microns /WT: 20kgs (empty) / Inlet Size : 28mm (3/4") / Outlet size : 28mm (3/4")

[2] AQUA-MINI (SS) : 2,500L/HR > 0.01

Complete Stainless Steel In-Line Water SUPERFINE Filtration System, for residential, commercial and industrial Water supply which gives superior Filtration Power, offers Hassle Free Maintenance and offers an **AUTOMATIC Backwash System**.

APPLICATIONS : - Ideal for cleaning water for Kitchens, Laboratories where high levels of hygiene are required

ADVANTAGES :

- **SIMPLICITY** – simple yet efficient filtration
- **EASY INSTALLATION** – Line IN and Line OUT
- **REMOVES**: 99% of all bacteria & viruses
- **SIMPLE & EFFICIENT & BACKWASH** – (multiport valve)
- **REMOVES** – chloramines & absorbs ammonia

Specifications : Size (Diam x Ht) : 100 x 1100mm / Filter Type: Stainless Steel—Zeolite Resin / MinWP: 1Bar / Max WP: 20 Bar / Operating Flow : 2,000L/min / Particle Size < 10microns /WT: 20kgs (empty) / Inlet Size : 28mm (3/4") / Outlet size : 28mm (3/4")

[3] AQUA-UV(SS) : 500L/HR > 0.01

AQUA LASER - UV in line Stainless Steel Ultra Violet Water Purifier for Drinking Water. Using the latest US technology in low energy UV Water Treatment, - 100% of all water passing through this Stainless Steel Housing is **safe to drink**. A bulb indicator on the control box indicates that the unit is working effectively.

APPLICATIONS : - Ideal for cleaning water for Showers, Baths, Washing Machines and general use, Lodges & Hotels

ADVANTAGES :

- **SIMPLICITY** – simple yet efficient filtration
- **EASY INSTALLATION** – Line IN and Line OUT
- **HIGH FILTRATION RATES**: 3,000l per hour

Specifications : Size (Diam x Ht) : 75 x 430mm / Filter Type: Zeolite Media Resin casing / MinWP: 60psi / Max WP: 125psi / Operating Flow : 500L/min / UV Doseage > 16,000 uWskm² /WT: 5.4kgs / Inlet Size : 28mm (3/4") / Outlet size : 28mm (3/4") 220v

[4] AQUA-ZERO B®: 4L/min > .10 microns

3 stage low pressure TOTAL FILTRATION system which utilizes [1] Polyurethane Filter (removes suspended particles) - [2] Ion Exchange to purify, and a [3] Carbon filter to remove foul odours to produce 4L of pure drinking water

APPLICATIONS : - Ideal for Point of Use drinking water

ADVANTAGES : Zero B resin technology to eliminate Bacteria and Virus / Does not require electricity / Total Purification capacity of 40,000 ltrs / Separate water meter to indicate capacity utilization, filter change required after 40,000L

Specifications : Size (Diam x Ht) : 300 mm / Filter Type: Zeolite Media Resin casing / MinWP: 1Bar / Max WP: 5 Bar / Operating Flow : 3,000L/min / Particle Size < 10microns /WT: 20kgs (empty) / Inlet Size : 28mm

STEEL RESERVOIRS

STEEL PANNELLED PVC LINED WATER TANKS : Aqua Tanks are made of Steel panels and lined with a strong ultrasonically welded PVC liner. Being knock-down panels, they are easily transported and quickly assembled. The Shade Net roof keeps out debris and insects, whilst letting rain water in.

PRODUCT RANGE: 1.2m / 1.8m and 2.4m Height : 3,000L – 500,000L. Can be installed elevated, above or below the ground.

Installation: being round and made of steel can be installed either ABOVE or BELOW ground. We have 3 fully trained Sub-Contractors, - who can install an average size tank in a 3-4hrs (excl Excavation) – however, being VERY simple to install, - we are more than happy to advise a client should he wish to install himself.

Competitive Advantages:

- No Size Limitations (ie 3,000L to 500,000L)
- All Tanks are Knockdown, making transportation or relocation easy.
- The Exterior of the Tanks are NOT affected by UV – and do not heat up like Poly Tanks
- In the unlikely event that a leak should develop, these are easy to repair – even underwater
- Can be installed both BELOW and Above Ground
- Water contents stay much cooler than Black PVC tanks

PRESSURE PIPES

We STOCK a complete range of Pressure Pipes and Fittings—from 1/2" - 4"

IRRIGATION

We stock and supply a COMPLETE range of POP UP Irrigation heads
